TRIO

TRIO is an Erasmus+ project (2022 – 2024) that aims to empower citizens of different ages through informal education, in the areas of HEALTH, DIGITAL and DATA literacy.

EMPOWERING CITIZENS THROUGH DIGITAL, HEALTH AND DATA LITERACY: THE TRIO PROJECT

The TRIO project aims to develop a concerted upskilling pathway to improve health, digital and data literacy of adults of all ages, promoting adult education through the development of digital readiness, resilience, and capacity.

THE PROJECT OBJECTIVES ARE

1. Increasing health, digital and data literacy of citizens through informal learning strategies and tools.

2. Broadening access to knowledge and user-friendly tools co-developed with the target groups.

3. Increasing capacity of adult educators to provide low-threshold and highly adaptable training on health, digital and data literacy.

4. Promote future sustainability and uptake of the TRIO tools and materials.

Over two years, TRIO will develop a modular approach with a manual, a curriculum and a complete toolkit for adult educators, supported by a digital learning platform that ensures adaptation to the changing needs of users, technology and context. TRIO will also develop a Green Paper to be delivered to policy makers and relevant European Initiatives.

EDUCATIONAL PLATFORM TRIO

The core of the project is an interactive learning platform to enhance health, digital and data literacy.

The interactive learning platform will offer multimedia-based learning experiences to the users, with a comprehensive approach to understand the main components of the TRIO literacies, assess the necessary tools, understand what to address in daily life and receive tips on how to do it.
